Assembly instructions are simple. The printed whole page will be the bag. You will not have to trim out anything

#1

This side has writing instructions. Do not glue or seal the other side of the paper past the line. Don't glue it past the arrow line or it will cover some words on the bag.

Seal the whole strip from this point on down to the end after the bag loop has been assembled. Do this for the top & bottom seal

#2

This side of the paper, that has no writing, is supposed to be glued over the whole flap with the writing to seal it closed. Glue this page over the other side of the paper.

Things you may need

To seal the bag closed. You could use a glue stick, some staples, or double sided tape. We used staples & tape. You will also need to have them printed onto glossy flyer paper/presentation paper/brochure paper/glossy photo paper 8.5x11 inch.

#3

Seal the bottom with a glue stick, staples, or double sided tape. We used staples & tape for this one.
